

After five years of teaching high school with an emphasis on assisting students to become academically stronger, I hope to utilize my skills as an academic advisor for Crescent College.

During my academic teaching career, I assisted students in navigating personal goal setting, career development, and academic planning — all tasks directly applicable to the work of an academic advisor. My empathetic nature, communication skills, and student-centric orientation make me the ideal candidate for this job.

I would be honored to discuss how my educational background can be applied to Crescent College students.

Sincerely,

Morgan Ellis
