

Hey Dr. Nguyen,

Just putting it out there—I'm super interested in the Clinical Pharmacist gig at ValleyCare. I've been working in inpatient pharmacy for, what, like six years now? Time flies. I know my way around all the nitty-gritty and honestly, I thrive when I'm in the thick of things with a solid team. You want better patient outcomes? I'm your person.

Quick brag: Back at St. Francis, I set up a new transition-of-care thing that actually knocked readmission rates down by 18%. Not to get all sentimental, but I'm totally obsessed with patient-centered care, and I'll never stop learning or finding new ways to make things run smoother. I'm all in on precision and always show up with a little extra empathy in my back pocket—makes shift work feel a whole lot more human, you know?

Would love to bring my expertise (and, let's be real, my borderline annoying optimism) to ValleyCare. Hope we get to chat soon.

Take care,  
Maria Espinoza
