

Hey Dr. Owens,

This Prior Auth Pharmacist role at AxisRx honestly sounds right up my alley. For the past couple years, I've been up to my eyeballs reviewing specialty med criteria, bouncing between providers, trying to make some sense out of the chaos. At MedAssist, I basically lived and breathed Medicare Part D and all those commercial formularies—lucky me, right?

I geek out over keeping things fair (nobody likes a curveball), and I'm all about cutting through red tape to make sure clinical reviews actually help people instead of slowing them down.

Would love to jump in and back up your pharmacy ops crew.

Thanks for considering me!

Farah Zaman
