

**Dear Professor Lang,**

**I am applying for the undergraduate research assistant role in your lab focused on AI and human interaction at CMU. I'm a sophomore majoring in computer science and recently completed a project in NLP that involved sentiment classification of dialogue transcripts.**

**I am proficient in Python, NumPy, and huggingface transformers, and I'm eager to contribute to research that connects machine learning with real-world behavior.**

**Sincerely,  
Ethan Walsh**
