

**Dear Ms. Diaz,**

**I'm submitting my application for the Junior Data Analyst role at BluePeak Technologies. I just graduated with a BSc in Computer Science and specialized my senior thesis on anomaly detection in time-series data.**

**My internship at OceanIQ Labs involved writing Python code for automating ETL functions, and I helped develop a dashboard using Tableau and SQL. I would be happy to help your team make data actionable and usable.**

**Thank you for your time and consideration.**

**Best,**

**Daniel Hwang**
